Latest pdf braindumps provider, high pass rate

**Exam :** 1Z0-531

**Title :** Oracle Essbase 11 Essentials

**Vendors :** Oracle

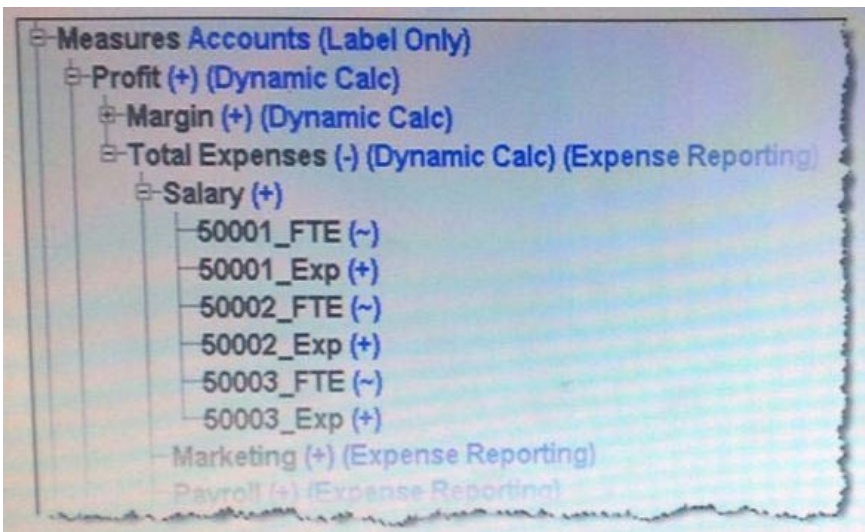

**Version :** DEMO

1. Which six files are involved in database recovery for block storage option after a database crash?

- A. Essn.pag – data
- B. Essn.ind – index
- C. Essn.dat
- D. Temp.dat
- E. Dbname.esm - kernel file that contains control information for db recovery
- F. Dbname.tct - transaction control table
- G. Dbname.ind - free fragment file for data and index free fragments
- H. DBname.otl
- I. Metadata folder

**Answer:** A,B,E,F,G,H

2. Which two options would provide a better design for the following accounts and metrics.?

- A. If there are a small number of accounts that require FTE and Expense dollars, split Accounts and Metrics into 2 dimensions
- B. If there are a large number of accounts that require FTE and Expense dollars, split Accounts and Metrics into 2 dimensions
- C. If reporting dictates FTE and dollars in the columns and accounts in the rows, split Accounts and Metrics into 2 dimensions
- D. If block size is large, then keep Accounts and Metrics as one dimension with a dense dimension

**Answer:** B,D

3. Identify the two true statements about incremental loading.

- A. Allows for real time data access for end users.
- B. Creates \*subscribes\* along the main slice in the database.
- C. Materialization of slices is required to provide users the correct query results.
- D. Different materialized views may exist within a slice as compared to the main slice of the database.

**Answer:** A,C

4. You should back up the following three for ASO.

- A. Hyperion\_Home \common

- B. Essbaseinstallfolder\bin
- C. ARBORPATH \app\appname
- D. Essbaseinstallfolder \locale
- E. Essbase.sec
- F. Essbase.cfg

**Answer:** A,E,F

5. You have the following analysis requirement. Products roll up to Product Family which rolls up to Product Category. You also need to group Products by Product Manager. Product Managers may manage one or more Products across product families. You do not need to create reports with Product Manager by Product Family. You need to secure products by Product Manager for planning submissions.

You consider Shared members as a solution because of which two options?

- A. Shared members provide cross tab reporting (Product Manager in the rows and Product Family across the column)
- B. Shared members provide additional categorization but results in a smaller database than if you were to add Product Manager as a separate dimension
- C. You can assign security to shared members
- D. Shared members can be assigned to sparse members only

**Answer:** B,C

6. Identify four disadvantages / considerations when using a transparent partition.

- A. Old data
- B. Slow retrievals
- C. Slow calculations if referencing dynamic calc members in the source
- D. Outline sync complexities
- E. Increased network load
- F. Downtime required to sync data

**Answer:** B,C,E,F

7. Assuming Sales and Year are sparse and Actual is dense, what two actions will the following calc script perform?

```
FIX (Actual, &CY, Sales)
  DATAEXPORT "BINFILE" "data.txt";
ENDFIX
```

- A. Export the data for actual, current year, sales into a text file called data.txt
- B. Export the data for actual, current year into a text file called data.txt
- C. Export data blocks in a compressed encrypted format
- D. Create a text file that can be imported using the DATAIMPORTBIN calc command in another database that has different dimensionality

**Answer:** B,C

8. A calculation script is performed on a database for which Create Block on Equation is OFF. The command SET CREATEBLOCKONEQ ON is issued immediately before an equation in the script.

Which statements accurately describe when blocks will be created? (Choose two)

- A. Blocks will be created ONLY when the equation assigns non-constant values to members of a sparse dimension
- B. Blocks will be created ONLY when the equation assigns constant values to members of a sparse dimension
- C. Blocks will be created when the equation assigns either constant or non-constant values to members of a sparse dimension.
- D. No blocks will be created.

**Answer:** B,C

9. Market size is an attribute dimension with the following members: Large, Medium, and Small.

Which of the following options below represent valid syntax statements in a calc script?

- A. FIX (@ATTRIBUTE(Large))
- B. Calc Dim (Accounts, Markets, "Market Size");
- C. Calc Dim (Accounts, Markets, Market Size);
- D. FIX(Large)

**Answer:** A,C

10. Moving a stored entity member in a sparse dimension causes\_\_\_\_\_.

- A. a Full restructure
- B. an Index restructure
- C. an Outline restructure
- D. No restructure

**Answer:** C
