- A. Prevent unauthorized access to a system using network based rules
- B. Detect any changes to confidential data
- C. Perform network discovery and asset management
- D. Encrypt confidential data before allowing outward transmission from a system
- E. Scan systems and report on their compliance to a required standard

Answer: A,B

NO.4 The management server records audit events whenever actions in the console are performed.

Which two user activity audit events are disabled by default? (Select two.)

- A. Saving or deleting data
- B. Executing queries or reports
- C. Logging off the management console
- D. Logging on to the management console
- E. Executing searches from the monitors page

Answer: B,E

NO.5 Which action is unable to be controlled using memory controls within a prevention policy?

- A. Disabling DEP
- B. Buffer overflow
- C. Unusual memory allocations
- D. Thread Injection

Answer: D

NO.6 Which two statements accurately describe an advantage of using Symantec Data Center

Security: Server Advanced prevention policies over traditional malware protection products? (Select two.)

- A. Symantec Data Center Security: Server Advanced prevention policies protect a system by controlling the behavior of all processes running on that system.
- B. Symantec Data Center Security: Server Advanced prevention policies are platform agnostic.
- C. Symantec Data Center Security: Server Advanced prevention policies can be applied to a machine without installing agent software on the host machine.
- D. Symantec Data Center Security: Server Advanced prevention policies require infrequent signature updates.
- E. Symantec Data Center Security: Server Advanced prevention policies are proactive in protecting against Malware.

Answer: A,E

NO.7 What is an available action within the agent diagnostics policy?

- A. Allow the current user to override the applied prevention policy
- B. Enable the use of Event Viewer on the agent
- C. Install a new agent certificate
- D. Restart the IPS Service

Answer: D

NO.8 Which web server application is hosted on the management server?

- A. Oracle HTTP Server
- B. Microsoft IIS
- C. PostgreSQL Web Server
- D. Apache Tomcat

Answer: C

NO.9 Which statement is accurate when describing real-time file monitoring?

- A. The real-time file monitoring polling interval is configured in the global default settings.
- B. Real-time file monitoring is performed by user-mode drivers.
- C. When real-time file monitoring is enabled, the polling interval is shortened by default.
- D. When enabled, real-time file monitoring is applied to all agents.

Answer: B

NO.10 Where can the inactive session timeout for the management console be configured?

- A. sis-server.properties
- B. sis-version.properties
- C. sis-ui.xml
- D. managers.ini

Answer: A
