Latest pdf braindumps provider, high pass rate

**Exam** : **2V0-621**

**Title** : VMware Certified Professional  
6 - Data Center Virtualization  
Beta

**Vendor** : VMware

**Version** : DEMO

NO.1 An administrator needs to recover disk space on a previously-used thin provisioned virtual disk. The volumes where the administrator needs to recover the disk blocks are on VAAI-compliant storage arrays.

Which two actions should the administrator take accomplish this task? (Choose two.)

- A. Perform a Storage vMotion to another volume in order to force free space recovery to occur. This recreates the volume in a new location and recovers all unused space.
- B. Use VMware Converter to migrate the virtual machine to a new datastore. This will recreate the volumes and recover all unused space.
- C. Issue the `vmkfstools -vmfs unmap` command within the VMFS volume directory on the ESXi host console.
- D. Execute the `esxcli storage vmfs unmap` command.

**Answer:** B,D

NO.2 An administrator notices that the time on an ESXi 6.x host is incorrect.

Which two actions should the administrator take to correct this issue? (Choose two.)

- A. Modify the time for the host using the vSphere client.
- B. Correct the NTP settings in the `/etc/ntp.conf` file.
- C. Configure NTP from the Direct Console User Interface.
- D. Use the `vicfg-ntp` command from the vSphere Management Appliance.

**Answer:** A,B

NO.3 In a vSphere High Availability cluster, what is the VM Monitoring I/O stats interval default value?

- A. 60 seconds
- B. 90 seconds
- C. 120 seconds
- D. 180 seconds

**Answer:** C

NO.4 Refer to the Exhibit.

The number of vSphere HA heartbeat datastores for this host is 1, which is less than required: 2

An administrator receives the error message shown in the Exhibit.

Which two actions can be taken to clear the warning? (Choose two.)

- A. Add a Virtual SAN datastore and configure it for High Availability heartbeating.
- B. Set the advanced High Availability parameter `Das.heartbeatdsperhost` to 1.
- C. Set the advanced High Availability parameter `Das.ignoreInsufficientHbDatastore` to true.
- D. Add a shared datastore and reconfigure High Availability.

**Answer:** C,D

NO.5 An administrator is creating a new Content Library. It will subscribe to another remote Content Library without authentication enabled. Optimal performance is desired for the configuration.

What two steps should be taken to set up the library? (Choose two.)

- A. The Subscription URL should be provided.
- B. The library should be published externally.
- C. A file system should be used for this library.
- D. A datastore should be used for this library.

**Answer:** A,D

NO.6 Which VMware Single Sign-On component issues Security Assertion Markup Language (SAML) tokens?

- A. VMware Security Token Service
- B. Administration Server
- C. VMware Directory Service
- D. Identity Management Service

**Answer:** A

NO.7 Which two settings are required for Virtual Machine Component Protection (VMCP) to protect from All Paths Down (APD) and Permanent Device Loss (PDL)? (Choose two.)

- A. Host Monitoring
- B. VM Restart Priority
- C. Virtual machine Monitoring
- D. Response for Host Isolation

**Answer:** A,B

NO.8 When attempting to connect to a vCenter Server, an administrator observes the following at the top of the vSphere Web Client:

Could not connect to one or more vCenter Server Systems:https://vCenter.corp.com:443/sdk

What three reasons could be preventing the vSphere Web Client from communicating with this vCenter Server? (Choose three.)

- A. The vCenter Server machine is not responding via the network.
- B. An incorrect entry for this vCenter Server exists in the Single Sign-On service.
- C. The SSL certificates do not match the FQDN address for the server.
- D. The Platform Services Controller is external to this vCenter Server.
- E. The DNS entry for the vCenter Server is incorrect.

**Answer:** A,B,C

NO.9 Refer to the Exhibit.

Device Details	
<div style="border: 1px solid gray; padding: 2px;"> <span style="border: 1px solid gray; padding: 2px;">Properties</span> <span style="border: 1px solid gray; padding: 2px; margin-left: 10px;">Paths</span> </div>	
Owner	NMP
<div style="border: 1px solid gray; padding: 2px;"> <b>Partition Details</b> </div>	
Partition Format	GPT
▶ Primary Partitions	1
▶ Logical Partitions	0
<div style="border: 1px solid gray; padding: 2px;"> <b>Multipathing Policies</b> </div>	
▶ Path Selection Policy	Fixed (VMware)
Storage Array Type Policy	VMW_SATP_EQL

An administrator wishes to provide Load Balanced I/O for the device shown in the Exhibit. To meet this requirement, which setting should be changed?

- A. Storage Array Type Policy = VMW\_NMP\_RR
- B. Path Selection Policy = Round Robin (VMware)
- C. Storage Array Type Policy = VMW\_SATP\_RR
- D. Path Selection Policy = MRU (VMware)

**Answer:** B

NO.10 How does vSphere High Availability calculate the memory slot size of a virtual machine?

- A. Virtual machine memory reservation + overhead of largest virtual machine
- B. Virtual machine memory reservation - overhead of largest virtual machine
- C. Virtual machine memory reservation + overhead of smallest virtual machine
- D. Virtual machine memory reservation - overhead of smallest virtual machine

**Answer:** A

NO.11 An administrator observes a warning on the vSphere High Availability (HA) cluster:

This host currently has no management network redundancy

Which two actions would address the warning? (Choose two.)

- A. Add an additional uplink to the management vmknic.
- B. Include the advanced HA parameter das.ignoreRedundantNetWarning.
- C. Add an additional management vmknic to the vSwitch.
- D. Include the advanced HA parameter das.ignoreNetWarningRedundancy.

**Answer:** A,B

NO.12 An administrator is configuring Storage I/O Control. After enabling, the administrator notices high device latency and poor storage performance.

Which two actions would likely reduce latency and improve functionality? (Choose two.)

- A. Set the congestion threshold to 15ms
- B. Set the congestion threshold value to 5ms
- C. Ensure that each datastore has independent spindles
- D. Ensure that each datastore uses shared spindles

**Answer:** A,C

NO.13 Which two solutions require Physical Mode Raw Device Mapping (RDM)? (Choose two.)

- A. Direct access to the storage array device
- B. Virtual Machine Snapshots
- C. Hardware Acceleration
- D. Guest Clustering across ESXi hosts

**Answer:** A,D

NO.14 Which two methods are recommended for managing the VMware Directory Service? (Choose two.)

- A. Utilize the vmdir command.
- B. Manage through the vSphere Web Client.
- C. Manage using the VMware Directory Service.
- D. Utilize the dc rep command.

**Answer:** A,B

NO.15 An administrator is implementing a vSphere 6.x environment containing one vCenter Server and five ESXi hosts. The administrator has just finished deploying the vCenter Server appliance with an embedded Platform Services Controller (PSC) and needs to ensure that default security certificates within the vSphere 6.x environment are replaced with new certificates.

What should the administrator do to complete this task with the least administrative effort?

- A. Add the ESXi hosts to vCenter Server before updating the VMCA root certificate on the PSC.
- B. Make VMCA an Intermediate Certificate Authority to ensure each added ESXi hosts receives the same certificate.
- C. Replace the VMCA root certificate before adding the ESXi hosts to vCenter Server.
- D. Create ESXi host security certificates using the SSL Thumbprint mode to ensure consistency among all hosts.

**Answer:** C
