Title : Riverbed Certified Solutions
Professional - Application
Performance Management

Vendor : Riverbed

Version : DEMO

NO.1 Refer to the exhibit from the AppDoctor.

The primary bottleneck is probably due to:

- A. Processing at client
- B. Chattiness
- C. Packet loss
- D. Processing at server
- E. Latency

Answer: C

NO.2 Which of these can be used to define business groups? (Select 3)

- A. IP addresses
- B. Hostnames
- C. IP address range
- D. Subnets

Answer: A,C,D

NO.3 Which points are good candidates for port switched port analyzers (SPANs) when deploying AppResponse Xpert? (Select 3)

- A. Switches that are the first to see user traffic coming in from the Wide Area Network (WAN)
- B. Core switches
- C. Switches that host user virtual local area networks (VLANs)
- D. Switch ports and links that connect servers which host the most important applications to be analyzed
- E. Distribution switches

Answer: A,C,D

NO.4 Which of these is not an available data source for Dashboards?

- A. AppInternals Xpert
- B. AppResponse Xpert
- C. BrowserMetrix
- D. AppTransaction Xpert

Answer: D

NO.5 Which of the following are not required to set up pattern-based properties for grouping metrics in a panel? (Select 3)

- A. Create a new property name for each possible value.
- B. Add a description.
- C. Choose the new property name in the panel's grouping configuration.
- D. Enable custom properties either at the server level or dashboard level.

Answer: A,B,D

NO.6 Which three types of capture operations does AppTransaction Xpert support? (Select 3)

- A. Continuous capture
- B. Scheduled capture
- C. On-demand capture
- D. Automated download capture
- E. Encrypted capture

Answer: A,B,C

NO.7 For a given business group, which metric is most useful to determine how the systems in the business group acting as servers are responding to requests from clients?

- A. User response time (servers)
- B. User response time (clients)
- C. Server response time (servers)
- D. Server response time (clients)
- E. Initial application response time (TCP clients)

Answer: C

NO.8 What metric is used to check if web transaction analysis (WTA) is not overloaded with too much traffic to monitor?

- A. number of TCP connections / min (for HTTP/HTTPS sessions only)
- B. number of total page views / min
- C. number of HTTP requests / min
- D. number of unique URLs / min

Answer: C

NO.9 Each of the "dots" you see in the BrowserMetrix user interface represent:

- A. An end-user page view
- B. The web server tier
- C. The web application
- D. The server node for the transaction

Answer: A

Explanation:

Topic 3, AppResponse Xpert

NO.10 Highlighting a business group in the business group table and then clicking on the tool bar menu to launch the Response Time Composition Chart will show:

- A. The response time for the clients in the business group.
- B. The response time broken into categories for the clients in the business group.
- C. The response time broken into categories for servers in the business group.
- D. The response time for the top ten IP addresses in the business group.

Answer: C

NO.11 To integrate the Riverbed product suite into your existing trouble ticketing system, which of the following could be done? (Select 3)

- A. Use the built-in email and SNMP mechanism or a custom forensic script in AppInternals Xpert to send alerts to the existing system.
- B. Configure alerts in AppResponse Xpert to send SNMP traps to the existing system.
- C. Set up BrowserMetrix to send email alerts to an email gateway.
- D. Add email alerts to the RPM Dashboard settings.
- E. Configure Transaction Trace Warehouse to send email alerts to an email gateway when certain thresholds are met.

Answer: A,B,C

NO.12 In the Database Performance module, the Response Time (First Response) (sec) metric refers to:

- A. The cold cache response time, when the information is first requested from the database
- B. The response time from the warm cache, known as the First Response table
- C. The response time measured from the start of the database query to the receipt of the final response packet
- D. The response time measured from the start of the database query to the receipt of the first

response packet

E. The response time for stored procedure queries into the database

Answer: D
