Which syntax is correct?

- A. <s:Group position="center" />
- B. <s:Group center="true" />
- C. <s:Group horizontalCenter="0" verticalCenter="0" />
- D. <s:Group horizontalCenter="true" verticalCenter="true" />

Answer: C

NO.2 Give the ActionScript class:

```
public class MyClass implements IResizable { }
```

What can be said about MyClass?

- A. MyClass inherits all the functionality of the IResizable class
- B. MyClass is the super class of the IResizable class
- C. IResizable is the super class of MyClass
- D. MyClass must have all methods defined in IResizable

Answer: D

NO.3 Which two approaches could be used to show a component only within a specified Spark view state? (Choose two)

- A. Set the includeIn attribute on that component's MXML declaration and specify the name of the state
- B. Set the excludeFrom attribute on that component's MXML declaration and specify the names of all other states
- C. Use the AddChild class within the State's MXML declaration, and specify the component declaration within AddChild
- D. Set the state attribute on that component's MXML declaration and specify the value of the state
- E. Set the includeIn attribute within the root element of the component

Answer: A,B

NO.4 You are defining a User class with username and password properties to encapsulate data.

Which design pattern is being utilized?

- A. Observer
- B. Factory
- C. ValueObject
- D. Mediator

Answer: C

NO.5 What is the effect of the following code snippet:

```
<s:TextInput id="tf1" text="@{tf2.text}"/> <s:TextInput id="tf2"/>
```

- A. The text property of tf1 is bound to the text property of tf2
- B. The text property of tf1 is conditionally bound to the text property of tf2
- C. The text property of each field is bound to the text property of the other field

D. This code is invalid and will generate a compiler error

Answer: C

NO.6 Which two statements about HTTPService, WebService and RemoteObject are true? (Choose two.)

- A. Service invocations to other sub-domains may fail without crossdomain.xml
- B. WebService supports the invocation of SOAP and XML-RPC web services
- C. WebService and RemoteObject can only be used with SOAP web services
- D. RemoteObject will be faster than an equivalent WebService due to the use of AMF
- E. HTTPService cannot be used to retrieve XML

Answer: A,D

NO.7 You are creating a custom component that extends the SkinnableContainer class. You want to require that the skin of your component use a Spark Button in the layout. What should you do?

- A. Declare and style the button inside your class file, not in the skin
- B. Define a SkinnableComponent that extends the Button class
- C. Define SkinPart metadata to make a Button required
- D. There is NO way to require a button in a SkinnableContainer skin

Answer: C
