Exam : **C1000-002**

Title : IBM MQ V9.0 System
Administration

Vendor : IBM

Version : DEMO

NO.1 Which command will write an image of all local queues in the SATURN queue manager to the log for use in media recovery?

- A. rcdmqimg -t qtocat * -m SATURN
- B. rcrmqobj -t qmgr -rn SATURN
- C. rcdmqimg -qLocal ALL -m SATURN
- D. rcrmqobj -qLocal ALL -m SATURN

Answer: A

NO.2 Messages are building up on a transmission queue. The administrator issues the following command: DIS CHSTATUS(QM1.TO.QM2) ALL. What output can the administrator use to determine the cause?

- A. A higher than expected RVCRTIME value could indicate the receiver is taking too long before acknowledging the message
- B. A higher than expected COMTIME value could indicate too much time setting up communications
- C. A higher than expected NETTIME could indicate too much time across the network
- D. A higher than expected PROCTIME value could indicate the message is taking too long to get through the exits

Answer: C

NO.3 An administrator encountered a syntax error while executing an MQSC command script sent by the development team. Which option will help to identify the syntax errors without creating the actual objects?

- A. Use the runmqsc command with the -c flag
- B. Use the runmqsc command with the -v flag
- C. Use the runmqtmc command with the -v flag
- D. Use the runrnqtmc command with the -c flag

Answer: B

NO.4 What are two fundamental requirements that a shared file system must meet to work reliably with IBM MQ for multi-instance queue managers?

- A. Guaranteed exclusive access to files for data write integrity
- B. Release locks on failure
- C. Must be unmounted
- D. Need administrative authority
- E. Must be a version of NFS

Answer: A,B

NO.5 What must be moved to a shared disk to migrate a single instance queue manager to a multi-instance queue manager?

- A. The queue manager data and logs
- B. Logs and local file system
- C. Queues and message me
- D. Shared directory and message driven bean

Answer: A

NO.6 Which FFST Report field can be used to search the IBM Support Site?

- A.** Error ID
- B.** FFSTID
- C.** Probe ID
- D.** FOC ID

Answer: C
