Title : IBM SmartCloud Application
Performance Management
V7.7 Fundamentals

Vendor : IBM

Version : DEMO

NO.1 What is the purpose of the IBM Support Assistant tool?

- A. It gathers log files, configuration information, and version information.
- B. It installs product-specific data collectors for agents to assist in troubleshooting.
- C. It gives information about the health of the managed systems, situations, and environment configuration.
- D. It provides an optional cleanup step if any of the portal server-generated workspace queries must be deleted.

Answer: A

NO.2 What can be performed from the IBM SmartCloud Application Performance Management V7.7 user interface?

- A. Restart an APM agent.
- B. Modify the configuration of an agent.
- C. Modify the threshold value of a metric.
- D. Modify the IBM Tivoli Netcool/OMNibus configuration.

Answer: C

NO.3 Which three methods directly access the Tivoli Enterprise Portal on Windows?

- A. Java Web Start
- B. browser client interface
- C. desktop client interface
- D. Jazz for Service Management Java widget
- E. Tivoli Integrated Portal Java client interface
- F. IBM SmartCloud Application Performance Management user interface browser widget

Answer: B,C,F
