Exam : **C_HANAIMP_17**

Title : SAP Certified Application Associate - SAP HANA 2.0 (SPS05)

Vendor : SAP

Version : DEMO

NO.1 You have made changes to the design-time files of several calculation views in your DEV environment. These calculation views belong to the same project. Before deploying your calculation views to a PROD environment, which sequence of steps is required in the DEV environment?

- A. Build the HDB module -> Build the project
- B. Build the project -> Build the HDB module
- C. Export the HDB module -> Export the project
- D. Activate the project -> Build the HDB module

Answer: B

NO.2 Which of the following data sources can you include in a graphical calculation view?

Note: There are 2 correct answers to this question.

- A. Table function
- B. SQL view
- C. Procedure
- D. Scalar function

Answer: A,B

NO.3 In SAP Web IDE, you rename a dimension calculation view that is used by a cube calculation view.

Afterward, you perform the following build operations:

*Build the dimension calculation view as a single object.

*Build the entire SAP HANA database module. What is the outcome of the build operations?

- A. The first build is successful.
The second build is successful.
- B. The first build fails.
The second build fails.
- C. The first build is successful.
The second build fails.
- D. The first build fails.
The second build is successful.

Answer: A

NO.4 In a calculation view, which object type do you assign to a projection node to consume a Predictive Analysis Library (PAL) function?

- A. Table function
- B. Input parameter
- C. Scalar function
- D. Synonym

Answer: A

NO.5 You want to join 2 tables in a calculation view. Why do you use a non-equijoin?

- A. The cardinality is impossible to determine.
- B. The join condition is not represented by matching values.

C. Join columns do not have the same datatype.

D. The number of joined columns is different in both tables.

Answer: B
