Exam : **D-ECS-DS-23**

Title : Dell ECS Design 2023 Exam

Vendor : EMC

Version : DEMO

NO.1 A storage administrator must find the capacity of its ECS namespaces for a specific period of time.

Which ECS Portal Monitor page shows the details?

- A. Nodes & Data Disks
- B. Capacity utilization
- C. Metering
- D. Storage efficiency

Answer: C

NO.2 A regional small business has multiple remote offices with 25 Windows users. The business wants to have a central repository to archive important files and protect them for seven years. Which ECS utility allows Windows to move files using CIFS protocol to the ECS for archiving and long-term retention?

- A. GeoDrive
- B. Grafana
- C. xDoctor
- D. S3 browser

Answer: A

NO.3 Which approach is least effective in designing a multi-tenant architecture for ECS?

- A. Implementing strict quota management for each tenant
- B. Enforcing tenant isolation at the network layer
- C. Allocating the same computational resources to all tenants, regardless of need
- D. Using separate storage buckets for each tenant

Answer: C

NO.4 For an ECS cluster, which protocol is best suited for web-based applications that require secure data transfer?

- A. HTTPS
- B. RPC
- C. FTPS
- D. Telnet

Answer: A

NO.5 Which local data protection method does ECS use?

- A. Triple mirroring and erasure coding
- B. Erasure coding only
- C. Double mirroring and erasure coding
- D. Triple mirroring only

Answer: A

NO.6 What is the minimum number of VDCs that can be managed as a federation?

- A. 3

- B. 4
- C. 2
- D. 5

Answer: C

NO.7 What factor is least relevant when designing an ECS networking solution for a global application?

- A. The geographical location of data centers
- B. Local regulatory and compliance requirements
- C. The interior design of the data center
- D. Network latency and packet loss

Answer: C

NO.8 In differentiating between protection configurations, which option provides the highest level of data durability for ECS object storage?

- A. Single-copy storage in one Availability Zone
- B. Data replication across multiple Availability Zones within a region
- C. Encryption at rest only, without additional replication
- D. Storing backups on physical media offsite

Answer: B

NO.9 Which two actions should be taken during the design phase to ensure that Dell Technologies' hardware and software fulfill the customer's needs? (Select 2)

- A. Hand-off the solution document to the Solutions Architect.
- B. Conduct prequalification interview with the end users.
- C. All key stakeholders should review solution document.
- D. Analyze the customer environment.

Answer: CD

NO.10 What are essential considerations when recommending activities for the end-to-end process of solutions design on ECS?

- A. Incorporating user experience design principles
- B. Planning for holiday parties in the project timeline
- C. Ensuring backward compatibility with legacy systems
- D. Aligning project milestones with business objectives

Answer: A,C

NO.11 For an ECS solution requiring high availability and fault tolerance, which node type should be prioritized?

- A. Low-cost, single-instance nodes
- B. High-availability configured nodes
- C. Nodes with the latest graphical cards
- D. Nodes with the most aesthetically pleasing design

Answer: B

NO.12 What factor has the least impact on ECS performance?

- A. Choice of storage media (SSD vs. HDD)
- B. Color scheme of the user interface
- C. Network bandwidth and throughput
- D. Type of workload (compute-intensive vs. memory-intensive)

Answer: B

NO.13 What access control mechanisms are crucial for implementing data permissions in an ECS cluster for client access?

- A. Role-Based Access Control (RBAC)
- B. Network-based ACLs
- C. Physical security of the data center
- D. Identity and Access Management (IAM) policies

Answer: AD
