- D. SMTP servers

Answer: B,C

NO.6 Which of the following statements is true regarding Session-based antispam techniques?

- A. The entire mail content is inspected.
- B. They are enabled in the session profile only.
- C. SMTP commands, sender domain and IP address are checked.
- D. They are checked after application-based antispam techniques.

Answer: C

NO.7 A FortiMail administrator must enforce the following company policy:

1. All emails containing executable attachments must be detected.
2. This detection must be file name independent. For example, if a user renames an executable from .exe to .txt, the file should still be detected.

Which FortiMail inspection technique should the administrator apply?

- A. Content profile > Attachment filtering rule to block all executable extensions
- B. Content profile > File Type filtering rule to block all executable files
- C. Antispam profile > Banned Word entry to block all executable files
- D. Content profile > Content Monitor entry to block all executable files

Answer: B
