Exam : **M2090-822**

Title : **IBM Information Integration &
Governance Sales Mastery v1**

Vendor : **IBM**

Version : **DEMO**

NO.1 Which of the following is an Information Server for Data Integration capability?

- A. Manage data growth in production environment and archive historical data
- B. Cleanse data and monitor data quality, turning data assets into trusted information
- C. Understand data & govern using a meaningful directory of governed information
- D. Transform and deliver data to any system, improving time to value

Answer: B

NO.2 Your customer has Teradata, DB2 and other on-premises data sources in their data center as well as dashDB and other data residing in the cloud. They need access to their existing data sources and their cloud data sources for a new customer retention project and it requires some sophisticated data integration to bring it all together but they do not have the IT resources or budget to stand up a new data integration environment in their own data center for this project.

What Information Integration and Governance solution would you propose?

- A. Information Governance Catalog on the Cloud
- B. DataWorks
- C. Master Data Management on the Cloud
- D. DataStage on the Cloud

Answer: D

NO.3 Your client is looking for a solution to build a data warehouse in support of a new marketing campaign project. They have limited budget and limited resources to manage the software installation and hardware in a short time frame. They are dealing with a diverse set of data sources on-premises and in the cloud and it will require a set of processes that run in batch to update their warehouse with new data on a daily basis and some sophisticated transformation functions will be required to transform the data prior to loading it into the warehouse.

Which strategy would you propose to meet their needs?

- A. DataStage on-premises
- B. DataStage on-premises with DataWorks Lift to do the data movement
- C. DataWorks
- D. DataStage on the Cloud

Answer: B

NO.4 When working with a prospect on a master data opportunity, what must you keep in mind about these types of corporate initiatives?

- A. These projects are typically driven by IT people who work in tandem with a large consulting firm
- B. It is more than just a technology and includes the disciplines, practices and processes to accommodate, control and manage change in your master data assets
- C. They always take a minimum of 2 years to deploy regardless of the scope of the project and how many systems are involved
- D. Master data projects do not necessarily have to involve many applications and systems but can focus on one ERP application

Answer: B

NO.5 A client needs to quickly and securely move data from their on-premises PDA data warehouse

to dashDB to support new analytics projects. This will potentially involve upwards of 10 terabytes worth of data and they want a very simple but high speed data transfer solution that has minimal impact on their network to move the data.

Which Information Integration and Governance solution will best fit their needs?

- A. DataWorks
- B. DataWorks Lift
- C. Stored IQ
- D. DataStage on the Cloud

Answer: B
