**Exam** : **NCSE-Level-1**

**Title** : Nutanix Certified Systems Engineer (NCSE): Level 1

**Vendor** : Nutanix

**Version** : DEMO

**NO.1** A prospect is seeking a Nutanix solution for a mission critical application that needs to sustain two simultaneous node outages and prefers that the cluster be able to fully rebuild both data and metadata in the event hardware issues.

what is the minimum number of nodes required for the cluster?

- A. 4
- B. 5
- C. 7
- D. 6

**Answer:** B

**NO.2** A prospect provides sizing details for a new application that will require 15TiB of usable storage. The prospect needs to plan for an additional 20% storage growth as part of the initial purchase. Including capacity to fully re-protect in the event of a node failure, which configuration provides minimal cost while meeting the capacity requirement?

- A. Option D
- B. Option C
- C. Option B
- D. Option A

**Answer:** B

**NO.3** An SE is in the discovery phase with a new customer. The customer is frustrated with the lack of transparency into their environment with the current monitoring tools. The customer has difficulty correlating the degradation of the end user experience with point-in-time events.

Which Prism feature should the SE demonstrate to show relevant value?

- A. A specific virtual machine's Performance Summary
- B. Event tab on the Alerts page
- C. A specific virtual machine's virtual disk Additional Stats
- D. Analysis page with custom charts and event reporting

**Answer:** D

**NO.4** In a competitive POC scenario, the prospect is testing Nutanix against VxRail and Hyperflex. The customer is interested in an "All in One" solution that's simple to deploy, manage, and grow.

Which two test plan items should the SE map to POC success criteria?

(Choose two)

- A. Expand the cluster by adding an additional node.
- B. Deploy HCIbench to determine maximum IOPS.
- C. Enable all data efficiency settings.
- D. Deploy Calm to automate application deployment.
- E. Use a single interface to manage and monitor the full stack.

**Answer:** A,E

**NO.5** A prospect is replacing a 3-tier virtualization infrastructure made up of several ESXi hosts and a SAN. The prospect recently bought a new 4-socket server to host their SQL server workload which uses the same SAN.

Which feature allows the prospect to continue using their new server without buying another SAN?

- A. Acropolis Container Services(ACS)
- B. Acropolis Block Services (ABS)
- C. Virtual Fiber Channel Controller
- D. Heterogeneous clusters

**Answer:** B

**NO.6** A prospect is concerned about the suitability and design of using Nutanix for an upcoming Avaya IP Office migration.

Which type of document should the SE provide?

- A. Filed Advisory
- B. Best Practice Guide
- C. Knowledge Base Article
- D. Reference Architecture

**Answer:** D

**NO.7** A prospect facing an upcoming VMware ELA renewal has a management directive to move to the public cloud due to perceived cost savings. Their virtualization team is currently struggling with refactoring applications for AWS. As a result, the virtualization team is pushing to evaluate VXRail and renew their VMware ELA.

Which two aspects of Nutanix should the SE highlight? (Choose two)

- A. Nutanix AHV
- B. Multi-cluster Management
- 5. Multi-hypervisor Support
- C. Cloud Connect
- D. Nutanix Calm

**Answer:** A,D

**NO.8** An SE and a prospect decide on a specific node configuration. The SE changes the Sizer scenario from Automatic to manual mode to select the exact configuration decided with the prospect.

What additional detail should the SE now consider in the Sizing scenario?

- A. N + 1 availability.
- B. Curator Capacity.
- C. CVM Memory overhead.
- D. Block Awareness.

**Answer:** A
