Exam : **PEGAPCSA86V1**

Title : Pega Certified System Architect (PCSA) 86V1

Vendor : Pegasystems

Version : DEMO

NO.1 In which three situations can you use a data transform? (Choose Three)

- A. To set default values for a case
- B. To create the dependent property after case creation
- C. To display the destination value as the location value
- D. To execute a flow action
- E. To copy the first and last name properties into a single property value

Answer: A,C,E

NO.2 You are developing a case type that processes scholarship applications. Scholarship applications advance based on the standardized test scores of the applicants. A decision shape directs the process flow. You want to test whether the process flows correctly, but you have not fully configured the user interface so that applicants can enter their standardized test scores . How do you test that the process flows correctly based on the decision?

- A. Use Live UI to see how the case processes and if an error occurs.
- B. Use a declare expression to set a value for the standardized test score field.
- C. Use the Clipboard tool to set a value for the standardized test score field.
- D. Use the Run Rule window to create a unit test to evaluate the flow rule.

Answer: C

NO.3 An on-demand transportation application has a Conversation preference data type. When customers use the application to request a ride, they can specify their conversation preference: whether they would like to talk to their driver or if they would prefer silence. Company stakeholders are interested in analyzing the conversation preference data . How is the Conversation preference data type sourced?

- A. No system of record
- B. Local system of record
- C. External system of record

Answer: A

NO.4 A restaurant has a case type that allows customer to book the dining room for events. Customers provide basic information including party size and indicate whether they want the restaurant to cater the event.

If the catering is not requires are given a rental rate quote.

If customers indicate that want the restaurant to cater the event, they must provide menu preferences and schedule an appointment to do menu before they are given a quote.

Which two options would you use to configure the case type to achieve the requested behavior? (Choose Two.)

- A. Create a check box for customer to indicate whether they want the restaurant to cater the event. Create a selection with the menu preferences and scheduling feature that has a Visible when condition.
- B. Create a process for customers to indicate menu preference and schedule the menu testing appointment. Add the process as a case-wide optional action.
- C. Create a check box for customer to indicate whether they want the restaurant to cater the event. Add a decision shape that evaluates whether the customer checks the box.

D. Create a process for providing menu preferences and scheduling the menu appointment. Create a parallel process for providing the customer with the rental rete quote.

Answer: A,C

NO.5 A form listing nearby restaurants has four columns:

- * Restaurant name
- * Restaurant location
- * Thumbnail image of the seating area
- * Make reservation (check box)

You want to ensure that users have the information they need to make a reservation regardless of screen size.

When viewed on a small screen, you do not need to display images.

What three configuration steps do you take to support this requirement? (Choose three.)

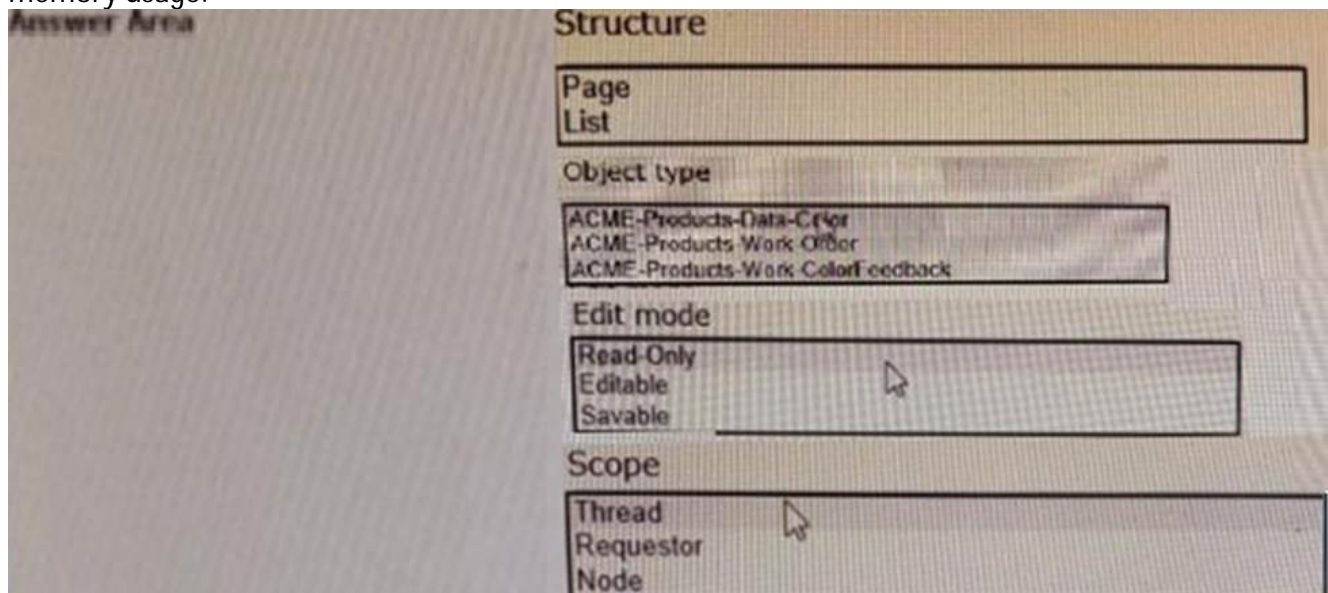

- A.** Set the importance of the Make reservation column to Primary.
- B.** Set the importance of the Restaurant name and Make reservation columns to Primary.
- C.** Set the importance of the image column to Other.
- D.** Set the importance of the Restaurant location and Make reservation columns to Secondary.
- E.** Set the importance of the image column to Secondary.
- F.** Set the importance of the Restaurant name column to Primary.

Answer: C,D,F

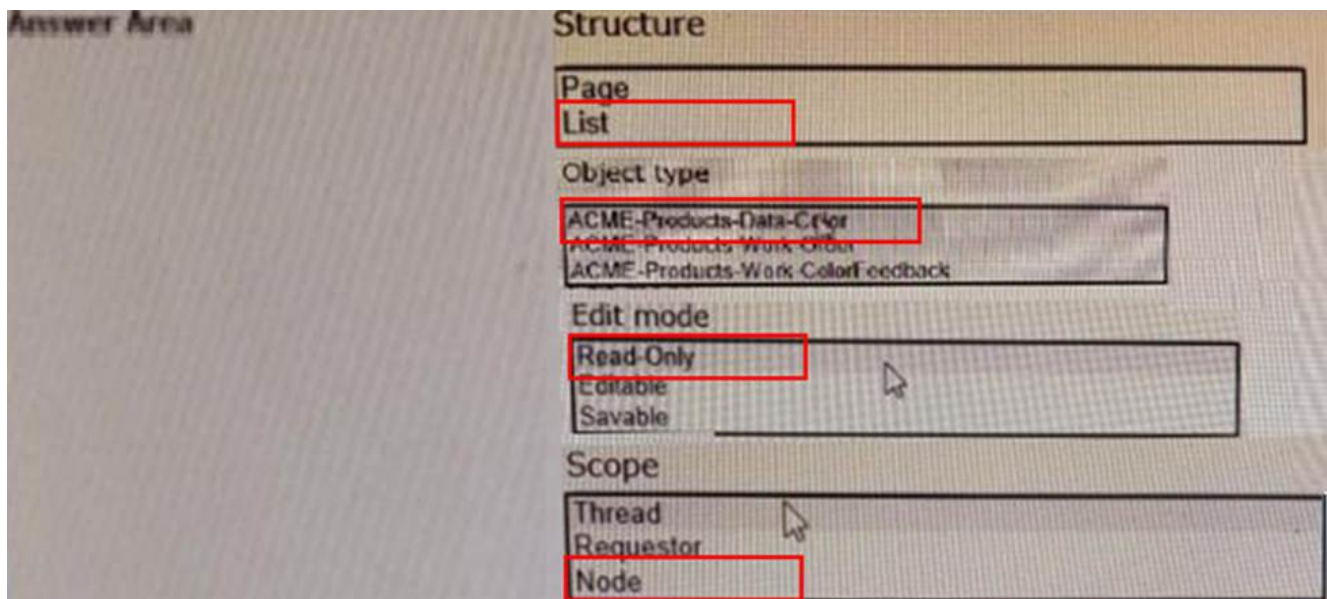

NO.6 HOTSPOT

A door manufacturer offers a finite list of colors on all its doors. As part of the order, customers can select the color of the door.

Select the data page definition configuration settings to source a color drop-down list to minimize memory usage.

Answer:
